

School Management System

Advanced technology available today can play a crucial role in streamlining education-related processes to promote solidarity among students, teachers, parents and the school staff.

The School Management System consists of tasks such as registering students, attendance record keeping, controlling absentees, producing report cards, producing official transcript, preparing timetable and producing different reports for teachers and parents.

The appearance of your student records says a lot about the quality of your school. Other educators and registrars make judgments based on student records that can permanently affect a student's life. SMS capabilities include the basics such as transcripts, report cards, attendance, and discipline as well as many other specialized capabilities, including parental access to real time student grades on the Internet. This means that not only administrators but also parents, teachers, and students have access to real-time data.
